

DEEPAK PRASAD SHAH

Full-Stack Developer | DevOps Engineer | Product Designer

Email: deepakprdshah@yahoo.com	Phone: +91-8288997559	Location: India / Nepal
Website: deepakprasadshah.com.np	GitHub: github.com/deiepak	LinkedIn: linkedin.com/in/deiepak

PROFESSIONAL PROFILE

Computer Science & Engineering undergraduate at Chandigarh University (Batch of 2028). Active Frontend & DevOps Intern at National Innovation Center (wildlife telemetry systems) and Adventure Sewa Pvt. Ltd. (hospitality management suite). Winner of Top 3 Team at SAP Hackfest 2026 out of 1,300+ participants nationwide. Holds 3 published hardware patents in counter-UAV defense and renewable energy automation. Proven track record of deploying 10+ production client websites, managing Ubuntu Server 24 VPS infrastructure, Cloudflare DNS routing, Docker containerization, and building scalable full-stack applications.

WORK EXPERIENCE & INTERNSHIPS

Frontend Developer & DevOps Engineer

July 2026 - Present [Active]

National Innovation Center (NIC) - Partially Remote | Wildlife Conservation Systems

- Engineered responsive React web dashboards for wildlife tracking and environmental sensor telemetry visualization.
- Configured automated CI/CD workflows, Docker containerization, and Ubuntu Server 24 cloud VPS deployment for 99.9% uptime.
- Collaborated with field researchers and embedded hardware engineers to bridge real-time sensor streams into web telemetry.

Tech Stack: React, JavaScript, DevOps, Ubuntu Server 24, VPS Management, Docker, CI/CD, GIS/Telemetry

Solo Product Designer, QA Tester & DevOps Engineer

August 2025 - Present [Active]

Adventure Sewa Pvt. Ltd. - Hybrid/Remote | Hospitality & Resort ERP Operations

- Designed full UX/UI flows and interactive prototypes in Figma for resort booking, POS billing, and adventure activity ticketing.
- Authored automated and manual test plans ensuring high reliability for payment transactions and reservations.
- Provisioned and hardened Ubuntu Server 24 VPS environments, automating server setups, Nginx routing, and Cloudflare DNS management.

Tech Stack: Product Design, Figma, DevOps, Ubuntu Server 24, VPS Management, Cloudflare DNS, QA Testing, CI/CD

HACKATHON HONORS & AWARDS

Top 3 Team - SAP Hackfest 2026

National Podium | 2026

- Secured a top 3 finish out of 1,300+ participants nationwide. Identified a friction-heavy real-world enterprise problem and engineered an end-to-end technical solution evaluated by senior SAP leadership and industry judges.

Ranked 3 / 300 Teams - Desert Offroad AI Challenge

Hackathon Award | 2025

- Developed Desert Offroad Navigator - a real-time computer vision terrain segmentation and NLP voice guidance system for extreme terrain drivers, securing 3rd place out of 300 competing teams.

PUBLISHED PATENTS

Drone Immobilization Over 2.4GHz

Flagship Official Published Patent

Design and implementation of a RF jamming system that safely immobilizes unauthorized drones operating on 2.4GHz bands with controlled disruption and minimal collateral interference. (RF Engineering, Counter-UAV, Embedded Systems)

Solar Panel Surface Cleaning System

Official Published Patent

Automated low-water mechatronic cleaning mechanism for solar arrays to prevent dust accumulation and maximize photovoltaic energy yield. (Mechatronics, Control Systems, Sustainability)

Mechanized Lifting System

Official Published Patent

Mechanized load handling mechanism engineered for constrained industrial spaces with high operator safety and ergonomic leverage. (CAD, Mechanical Design, Safety Engineering)

KEY PRODUCTION DEPLOYMENTS & SOFTWARE PROJECTS

Department Event Registration & Instant Verification System High-concurrency competition and event registration portal with tamper-proof QR code pass generation, organizer scanning interface for instant entry verification, and administrative analytics. Hosted on Ubuntu Server 24 VPS with Docker, Nginx, and Cloudflare DNS.	<i>Production Deployed - College Department</i>
Commercial & Freelance Business Websites (10+ Deployed) Engineered and deployed 10+ custom commercial websites and platforms (e-commerce, corporate portfolios, booking systems, dynamic RSVP portals) with React, Next.js, WordPress, Cloudflare DNS, and 95+ Google Lighthouse scores.	<i>10+ Deployed Production Sites</i>
CU Management System Staff Portal Product Designer for staff-facing CU Management System 2.0 at Chandigarh University, improving support ticketing UX, interface architecture, and resolution workflows.	<i>Live in Production (staff.cuchd.in)</i>
Real-Time Screen Sharing & Stream Tool Low-latency browser screen sharing using WebRTC peer-to-peer data channels and Socket.IO real-time signaling with automated room management.	<i>Docker Containerized on Render</i>
Agri_Doctor - 3-Tier AI Plant Health System Intelligent plant disease detection engine integrating computer vision, interactive Akinator-style diagnostic tree, and regional GIS disease trend mapping.	<i>AI / Agritech</i>
Algolabs - Algorithm Execution Visualizer Interactive platform for mastering Data Structures and Algorithms with real-time animated Canvas and D3.js step-by-step visualizations.	<i>EdTech Learning Platform</i>
IoT Smart Irrigation Controller Automated smart irrigation system built on ESP32, soil moisture probes, temperature sensors, and weather forecast APIs.	<i>Hardware / Firmware Prototype</i>

TECHNICAL SKILLS & COMPETENCIES

DevOps & Server Infrastructure:	Ubuntu Server 24 (LTS), VPS Creation & Management, Cloudflare DNS Management, Nginx Reverse Proxy, Docker Containerization, CI/CD Pipelines, Linux/SSH Administration, Server Hardening & Monitoring, Render, Vercel.
Frontend & Full-Stack Engineering:	React, Next.js, JavaScript (ES6+), TypeScript, Node.js, Express.js, Python, Flask, FastAPI, Tailwind CSS, WordPress, MongoDB, MySQL, REST APIs, WebRTC, Socket.IO, D3.js.
Product Design & Quality Assurance:	Product Design, UI/UX Wireframing, Figma Prototyping, User Journey Maps, Software QA Testing, Test Case Design, Automated Testing, Bug Tracking & System Reliability.
Embedded Systems, IoT & Hardware:	ESP32, Arduino, C/C++, RF Jamming Concepts, Sensors & Actuators, Wireless Communication, IoT Protocols.
Systems, Algorithms & Leadership:	Data Structures, Algorithms, System Architecture, GIS/Telemetry, Patent Drafting, Technical Writing, Nepalese Student Society Leadership.

EDUCATION

Bachelor of Engineering (BE) in Computer Science & Engineering Chandigarh University	<i>2024 - 2028 (Batch of 2028)</i>
Senior Secondary School (Class 11 - 12) Kendriya Vidyalaya, Embassy of India, Kathmandu	<i>Completed Science & Mathematics Stream</i>
Secondary School (Up to Class 10) Modern Indian School, Kathmandu	<i>Completed</i>
